Health Food Invoice Processor - Deployment Guide

🎯 Current Status: DEPLOYMENT WORKING ✅

After thorough investigation on July 14, 2025, the deployed version at `https://13a040b497.preview.abacusai.app/` is **fully functional** with all interactive elements working correctly.

✅ Verified Working Features

- **Checkboxes**: All visible and clickable (Select All + individual item checkboxes)
- **Dropdowns**: All functional and interactive (category selection dropdowns)
- **UI Layout**: Matches local version perfectly
- **JavaScript Hydration**: Working correctly with no console errors
- **Interactive Elements**: All responding to user input properly

🔧 Deployment Configuration

Next.js Configuration (`next.config.js`)

```
const nextConfig = {
  // Only use static export if explicitly requested
  output: process.env.NEXT_OUTPUT_MODE === 'export' ? 'export' : undefined,
  // Ensure proper hydration for interactive components
  reactStrictMode: true,
  // Optimize for better client-side performance
  swcMinify: true,
  images: { unoptimized: true },
};
```

Key Components with Client-Side Interactivity

All components requiring interactivity have the `'use client'` directive:

- `components/invoice-uploader.tsx` ✅
- `components/invoice-dashboard.tsx` ✅

🚀 Deployment Process

1. Pre-Deployment Checks

```
# Install dependencies
npm install

# Run type checking
npm run build

# Test production build locally
npm run start
```

2. Verify Interactive Elements

Test these pages for functionality:
- `/` - Main upload page
- `/test-dashboard` - Interactive elements testing
- `/test-real-data` - Real data testing

3. Deployment Verification Script

```
# Run automated verification (requires puppeteer)
node scripts/verify-deployment.js https://your-deployment-url.com
```

🐛 Troubleshooting Guide

Issue: Missing Checkboxes or Dropdowns

Symptoms:
- Checkboxes not visible in table
- Dropdowns showing but not clickable
- "Select All" column missing

Diagnosis Steps:
1. **Check Browser Console**
```javascript
  // Open browser dev tools and run:
  console.log('Checkboxes:', document.querySelectorAll('input[type="checkbox"]').length);
  console.log('Dropdowns:', document.querySelectorAll('select').length);
```

   1. **Verify JavaScript Loading**
      - Check Network tab for failed JS bundle loads
      - Look for 404 errors on `/_next/static/chunks/` files

   2. **Test Hydration**
```javascript
      // Check if React has hydrated
      console.log('React Root:', document.getElementById('__next') !== null);
```

Solutions:
1. **Clear Browser Cache**
- Hard refresh: `Ctrl+Shift+R` (Windows/Linux) or `Cmd+Shift+R` (Mac)
- Clear browser cache completely

   1. **Check Build Configuration**
      - Ensure `'use client'` directive is present in interactive components
      - Verify `output` mode in `next.config.js` is not forcing static export

   2. **Rebuild and Redeploy**
```bash
      npm run build
      # Deploy using your deployment method
```

Issue: Static Export Problems

Symptoms:

- Interactive elements work locally but not in production
- API routes not working

Solution:

- Remove `output: 'export'` from `next.config.js` if using server features
- Use hybrid rendering instead of pure static export

Issue: Hydration Mismatch

Symptoms:

- Console warnings about hydration
- Elements appear but don't respond to clicks

Solution:

- Ensure server-rendered HTML matches client-side rendering
- Check for conditional rendering based on `typeof window`

📊 Performance Monitoring

Key Metrics to Monitor

- **First Contentful Paint (FCP)**: < 2s
- **Largest Contentful Paint (LCP)**: < 2.5s
- **Cumulative Layout Shift (CLS)**: < 0.1
- **First Input Delay (FID)**: < 100ms

Monitoring Tools

- Browser DevTools Performance tab
- Lighthouse audits
- Web Vitals extension

🔄 Continuous Deployment

Pre-Deploy Checklist

- [ ] All tests passing
- [ ] Build completes without errors
- [ ] Interactive elements tested locally
- [ ] No TypeScript errors
- [ ] Environment variables configured

Post-Deploy Verification

- [ ] All pages load correctly
- [ ] Checkboxes are visible and clickable
- [ ] Dropdowns are functional
- [ ] No JavaScript console errors
- [ ] API endpoints responding (if applicable)

📞 Support

If you encounter issues with the deployment:

1. **Check this guide first** for common solutions
2. **Run the verification script** to identify specific problems
3. **Check browser console** for JavaScript errors
4. **Test in incognito mode** to rule out caching issues
5. **Compare with local development** to isolate deployment-specific issues

📝 Recent Changes (July 14, 2025)

- ✅ Verified all interactive elements working in deployed version
- ✅ Optimized `next.config.js` for better hydration
- ✅ Added deployment verification script
- ✅ Created comprehensive troubleshooting guide

Last Updated: July 14, 2025
